

School Mission & Policies

Blending Tradition with Global Perspectives

1. Our Founding Spirit (School Mission)

”Cultivating a Spirit of Harmony, Gratitude, and Integrity”

Rooted in the fundamental laws of education and the ideals of modern learning, our goal is to foster independent, creative individuals who cherish peace, democracy, and community contribution. We value Japan’s spiritual heritage, honoring the wisdom of our ancestors while building a bridge to the future.

Our Core Philosophy

Based on the spirit of Shinto (Japan’s indigenous spirituality), our motto is ”Jō Mei Sei Choku” (浄明正直). This translates to living a life that is:

”Jō”(浄) Pure (Clean): Keeping one’s heart and mind clear.

”Mei”(明) Bright (Cheer): Maintaining a positive and sunny disposition.

”Sei”(正) Right (Honest): Acting with justice and integrity.

”Choku”(直) Sincere (Straight): Being honest and humble.

We nurture students to embrace ”Keishin Sūso” (reverence for nature/spirit and respect for ancestors). Through this, we cultivate a ”compassionate heart,” a ”spirit of gratitude,” and a ”richness of character,” empowering students to thrive in society.

2. School Policies

I. Admission Policy (The Students We Seek)

We welcome students who:

Understand and resonate with our educational philosophy.

Proactively pursue their future goals and career paths.

Possess a compassionate heart and a desire to serve others and society.

Have the ambition to grow as a person and enhance their character.

II. Curriculum Policy (Our Approach to Education)

We integrate Shinto-based moral education to build ”pride” and ”confidence” in our students. Our goal is to develop academic ability, character, and judgment—essential ”life skills”—through the following pillars:

Career & Future Guidance: We offer diverse educational programs tailored to support each student's unique dreams and career paths.

Inquiry-Based Learning: To develop problem-solving skills, we utilize cross-curricular studies where students actively research and explore solutions.

Self-Discipline: Through a disciplined school life, we foster self-control and a strong sense of ethics.

ICT & Active Learning: We provide careful individual support and utilize modern technology (ICT) to promote independent research and deep learning, enhancing critical thinking skills.

Global Education rooted in Tradition: We believe true global citizens must first understand their own culture. We promote understanding of Japanese traditions alongside foreign language education to cultivate broad-minded, cultured individuals.

Holistic Growth: Through school events, volunteering, and club activities, we nurture independence, responsibility, teamwork, and a spirit of contribution.

III. Graduation Policy

Our graduates are individuals who have maximized their talents and developed the judgment and character to survive and thrive. They are:

Truly independent and culturally rich.

Equipped with a heart of service ("For the world, for people").

Filled with compassion and humility.

Ready to become valuable, contributing members of society.
